

TXDI Series Truck Mounted Sliding Vane Pumps

*Priced Identically to the matching TXD Series Pump

The new feature that sets the TXDI Series apart from the competition is the 180° porting. This feature provides a level of operational, installation flexibility and piping connections that gear pumps and other technologies often do not possess. The cylinder body that allows for the 180° porting feature is the only new part. All other parts used in the TXDI Series (vanes, seals, bearings, push rods, rotor and shaft, heads, relief valve, etc.) are exactly the same as the original TXD Series pumps.

TXDI Series

How Blackmer's sliding vane action works

TXD models are equipped with FKM O-rings and Blackmer mechanical seals that are compatible with all biodiesel and ethanol blends. TXD options include corrosion resistant relief valve, pneumatic relief valves and Buna or PTFE elastomers and seals.

Reliability

Durable pumps for fast and quiet operation. Sliding vane design provides sustained performance and trouble free operation.

Unique Features

Adjustable relief valve protects pump from excessive pressure. Optional air operated relief valve offers easy hose and nozzle handling. T-type strainers are available to protect pumping systems from damage caused by welding slag and foreign matter in the piping and tanks.

Sizing Options

Available in 2, 2.5, 3, and 4-inch port sizes with flow rates from 20 to 500 U.S. gallons (4.5 to 113 m³/h) and pressures up to 125 psi (8.6 bar).

Same Standard Blackmer TXD Series Hydraulic Adapter Compatible.

Applications

- Fuel oil delivery truck
- Fuel Transports
- Fleet refueling
- Lube oil
- Aviation refuelers
- Transport of:
 - Petro chemicals
 - Gasoline
 - Biofuels
 - Solvents
 - and many more
