- * **Simplified Color Cutting**
- * **Designed by Oil Field Expert**
- * **Rugged Injected Molding**
- * **Long Life Wiper and Easy Wiper Replacement**
- * **One Year Warranty**

Here are the top ten benefits of the Gauge Stick Squeegee :

1. Cleaner, faster way to gauge tanks and drums
2. Recovers adhering fluid from gauge stick and easily allows user to push liquids back into the tank or drum
3. Cuts down on expense by saving use of rags
4. Cuts back on contaminated jobsite waste and lowers EPA waste removal fees
5. Compact design (8-1/2" OAL), bright color (easy to be found if dropped on the ground) and light weight
6. Easy to use, with or without gloves on
7. Durably constructed and oil field tested
8. Prevents accidental rags from being dropped in tanks or drums, which may cause extraction pump failures
9. Spend less time in potentially hazardous area
10. It's a green product, helping keep the use of rags down and helping keep whatever liquids you are gauging in the tank, where it belongs, and not on rags or on the ground

** Drum Gauge Sticks can be different square sizes. The B&K brand drum sticks sold by Tank Truck Service & Sales are 3/4" square, same as the longer one-piece sticks. Other brands may be 5/8" square. Be sure to check your drum stick square dimension in order to purchase the correct Gauge Stick Squeegee model.

Comes with two wipers, lanyard and Allen wrench
